Office Action Summary

Art Unit: 1772

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-6, drawn to a process, classified in class 264, subclass 482.
 - II. Claims 7-10, drawn to a process, classified in class 264, subclass 482.
2. III. Claims 6 and 11, drawn to a product, classified in class 428, subclass 167.
3. The inventions are distinct, each from the other because:
4. Inventions I and III are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed can be made by a materially different process such as grinding or abrading.
5. Inventions II and III are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product can be made by a materially different process such as grinding or abrading.

Invention I and II are considered separate and distinct inventions that have different modes of operation, different functions or different effects. Group I is drawn to forming a concave portion in a substrate while Group II is drawn to forming a V-groove in the substrate.

Art Unit: 1772

6. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

8. Any inquiry concerning this communication should be directed to D. Loney at telephone number 703-308-2416.
